About Me

- ✓ Full stack developer
- ✓ Specialist in MERN stack
- ✓ Proven ability to solve complex problems
- ✓ Nearly a decade of experience with customer-facing negotiations
- ✓ Skilled with econometrics, statistics, forecasting, and complex analyses
- ✓ Recent graduate of a 24-week intensive programming bootcamp
- ✓ Excited to put freshly honed technical skills to work solving advanced issues
- ✓ Motivated to leverage extensive business acumen to build world class applications for a thriving organization

Recent Development Projects

Tee Time

- Final bootcamp team project
- A full stack, MERN application
- Multi-user golf score tracking, mobile focused, web application
- Secure user authentication and password encryption
- User to user messaging, and historic statistics viewing
- Primary role: user authentication, database set up, and data structure
- Deployed at www.teetimeproject.com

Scrabble Dabble

- First bootcamp team project
- Fast-paced single player game centered around spelling and letter variables
- Local storage-based high score tracking
- Leveraged front-end only development for small technical footprint
- Utilized dictionary based API for word verification and logic to determine word viability
- Primary role: functional logic around user submissions and viability
- Deployed at www.scrabble-dabble.com
